

Is Pink PET Is Blue PET Board

This cardboard is high-quality, stiff, and flat. The Metallized Blue PET and Pink PET film coatings strengthen the surface and provide a more elegant appearance. This cardboard is coated with PET film on both sides and the inner layers are made of recycled cardboard. The coated surface prevents oil and water absorption, making the product resistant to moisture. In both hot and cold environments, the film coating prevents unwanted wrinkles.

Grammage	Thickness	MD Stiffness	CD Stiffness
ISO 536	ISO 534	ISO 5628	ISO 5628
gr/m ²	mm	mNm	mNm
595	0.8	90	55

Applications

> Extra-strong rigid solid cardboard for food packaging, pastry making, trays, luxury packaging, birthday parties, bakeries, and other commercial uses.

Services

- > Embossing
- > Die Cutting
- > Guillotine Cutting
- > Strapping & Packaging
- > Labeling & Barcoding

Size

- > The minimum 350 x 400mm
- > The maximum 1500 x 1800 mm
- > Optional

Applicable Printing

- > pattern printing
- > Digital printing

Description

- > considering to variety of the raw materials, the values provided in the tables may vary by ±5%.
- > The stiffness Geometric Mean has been calculated using the formula $\sqrt{(B \text{ Stiffness} * E \text{ Stiffness})}$.
- > For detailed inquiries and technical information, please contact our team.
